

### LET'S MAKE OUR OWN CRAZY COLOR GUITAR.

Go ahead and get your materials ready, we need 2 white construction paper. You need string (any type of string) you need your paint whatever color you may have and different colors of construction paper for your circle in the middle. Glue and scissors.

First, we draw the body of the guitar one of our white construction paper, second we draw the stick of the guitar on the other white construction paper (so we're gonna be doing half of the guitar on each paper) After that, we cut both our white papers and we glue our guitar together. Then, after we let it dry for a little we start painting it, using different color of paints to make it colorful. Last, we start gluing our circle in the middle and our strings to finish up our guitar. Let's have fun!
